CAREER OBJECTIVE

Computer Science Engineering student passionate about building scalable software systems, AI-driven applications, and full-stack platforms. Strong foundation in problem solving, machine learning, and backend development. Seeking software engineering opportunities to develop high-impact solutions and grow within innovative engineering teams.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL (MySQL)

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap

Backend: Flask, Node.js, REST APIs

AI & Machine Learning: TensorFlow, LSTM Networks, NLP, Sentiment Analysis, Speech Recognition (Whisper ASR)

Libraries & Tools: Pandas, NumPy, Matplotlib, Scikit-learn, Git, GitHub

Mobile Development: Flutter, Dart

PROJECTS

Customer Engagement Sentiment Tracking System | *Flask, TensorFlow, Whisper ASR, React, JavaScript, CSS, Python*

- Designed and developed an AI-powered sentiment analysis platform to monitor customer engagement using bidirectional LSTM architecture.
- Integrated Whisper ASR for speech-to-text processing enabling sentiment evaluation from audio-based interactions.
- Built scalable backend APIs using Flask and interactive dashboards using React for real-time analytics visualization.
- Implemented NLP pipelines and data analytics workflows to track engagement trends and generate actionable insights.

AgriWatch – Smart Crop Monitoring System | *Python, MySQL, HTML, CSS*

- Developed a web-based platform to assist farmers in monitoring crop conditions and weather insights.
- Designed optimized MySQL schema for efficient storage and retrieval of agricultural data.
- Created dashboards and forms to improve usability and streamline data visualization.
- Implemented notification features supporting proactive agricultural decision-making.

Smart Expense Tracker | *Python, MySQL, HTML, CSS, JavaScript, Flutter, Dart*

- Built a full-stack expense tracking application with add, view, delete, and filtering capabilities.
- Optimized SQL queries and database design for efficient expense management.
- Implemented monthly analytics and category-based filtering.
- Structured modular backend logic to improve scalability and maintainability.

EDUCATION

Jawaharlal Nehru Technological University Hyderabad (CGPA: 8.89)

B.Tech in Computer Science Engineering

Hyderabad, India

Aug 2023 – Present

SR Prime College

Intermediate (MPC) - CBSE

Hanamkonda, India

June 2021 – June 2023

CERTIFICATIONS

Problem Solving (Basic) – HackerRank

Jun 2025

Entrepreneurship Awareness Program

Entrepreneurship Development Cell, JNTUH UCESTH

Mar 2024

Full Stack Web Development Workshop (QUEST 2025)

Department of CSE, JNTUH UCESTH

Apr 2025
